PROFESSIONAL SUMMARY:

Full Stack Python Developer with 3+ years of experience building AI-powered applications, enterprise ERP solutions, and scalable web platforms. Proficient in Python, FastAPI, Odoo, React.js, AWS, PostgreSQL, Docker, and LLM-based applications. Experienced in REST APIs, microservices, RAG pipelines, cloud deployment, and enterprise software development.

TECHNICAL SKILLS:

- Python
- JavaScript
- OpenAI
- Azure
- AWS
- RAG
- FastAPI
- Django
- Flask
- React.js
- PostgreSQL
- MongoDB
- MySQL
- Docker
- Github

PROFESSIONAL EXPERIENCE:

Senior Software Engineer — August 2023 to Present

Brainerhub Solutions, Ahmedabad

- Developed scalable AI-powered applications using FastAPI, React.js, and AWS.
- Built enterprise Odoo ERP modules and REST APIs.
- Integrated OpenAI, Azure OpenAI, and third-party APIs.
- Developed AI assistants, RAG pipelines, and Speech-to-Text solutions.
- Collaborated with cross-functional teams using Agile methodologies.

Software Engineer - Intern — April 2022 to September 2022

InnoTech solutions, Ch. sambhajinagar

- Built and maintained RESTful APIs for frontend-backend communication.
- Assisted in integrating third-party APIs and backend services.

SOFT SKILLS:

- Multi-tasking: Manage multiple tasks efficiently and meet deadlines.
- Teamwork: Collaborate effectively with cross-functional teams.
- Online Collaboration: Work efficiently using remote collaboration tools.
- Interpersonal Skills: Communicate clearly and build strong professional relationships.
- Adaptability: Quickly learn new technologies and adapt to change.

EDUCATION:

Bachelor of Commerce — Completed from 2019 to 2022.

Deogiri college

- Financial Accounting
- Business Economics

Full Stack Web Development — Completed from 2022 to 2023.

Masai School

- JavaScript (ES6+), Node.js, React.js
- Python, FastAPI, REST APIs
- PostgreSQL & Database Design
- Full Stack Web Application Development

PROJECTS:

DMA Reports (Healthcare AI)

Duration: Nov 2023 – June 2024

Technologies : Python • Odoo 16 • OWL • PostgreSQL • Azure OpenAI • Deepgram

Developed an AI-powered healthcare reporting platform that streamlined clinical documentation through real-time medical transcription, NLP-driven report generation, and intelligent audio processing. Integrated Speech-to-Text and Azure OpenAI services to automate medical report creation while ensuring secure patient data management, HIPAA compliance, and high-performance backend processing.

- Developed and maintained backend business logic using Python and Odoo.
- Integrated Deepgram Speech-to-Text for real-time medical transcription.
- Implemented Azure OpenAI for AI-driven medical report generation and NLP workflows.
- Built audio recording and processing modules for healthcare applications.
- Ensured secure handling of patient data following HIPAA compliance standards.
- Optimized application performance, database queries, and system reliability.

Spinf (AI Assistant Platform)

Duration: Jan 2024 – Dec 2024

Technologies : Python • FastAPI • React.js • AWS • Amazon S3 • API Gateway • DynamoDB • LLMs

Developed an AI-powered assistant platform that provides real-time support during meetings, presentations, and calls by converting speech to text, retrieving contextual knowledge, and generating intelligent responses using Large Language Models (LLMs).

- Designed and developed scalable RESTful APIs using FastAPI.
- Built knowledge management modules for organizing and retrieving contextual data.
- Integrated Speech-to-Text services for real-time transcription.
- Implemented AI-powered response generation using Large Language Models (LLMs).
- Deployed and managed cloud infrastructure on AWS (API Gateway, S3, DynamoDB).
- Optimized backend performance, API response times, and database operations.

GAIN (Data Analytics & Anomaly Detection Platform)

Duration: June 2024 – Jan 2025

Technologies : Python • FastAPI • Next.js • TypeScript • PostgreSQL • Airbyte • Docker • AWS • AI/ML

Developed a scalable AI-powered data analytics and anomaly detection platform that enables organizations to monitor business metrics, identify anomalies, visualize insights, and automate alerting across multiple data sources. The platform leverages machine learning models and real-time analytics to improve data quality, observability, and operational decision-making.

- Developed scalable REST APIs using FastAPI and SQLAlchemy.
- Designed and implemented anomaly detection, metrics, and alert management workflows.
- Integrated multiple data sources through Airbyte and custom ETL pipelines.
- Developed notification and alerting services for real-time anomaly monitoring.
- Managed PostgreSQL database design, migrations, and query optimization.
- Containerized services using Docker and contributed to a microservices-based architecture.

Monk-Odoo (Enterprise Business Management Platform)

Duration: July 2025 – Present

Technologies : Odoo • Python • PostgreSQL • JavaScript • OWL • REST APIs • FastAPI

Developed and maintained a comprehensive Odoo ERP solution by building 50+ custom modules for e-commerce, CRM, manufacturing, subscription management, content publishing, and business process automation. Integrated multiple third-party APIs and implemented custom workflows to streamline enterprise operations across various industries.

- Developed and customized 20+ Odoo modules across Sales, CRM, Inventory, Manufacturing, Accounting, Website, and Subscription Management.
- Designed custom business workflows, approval processes, and automation to improve operational efficiency.
- Integrated third-party services including Google Drive, Google Docs, Metals.dev, and external REST APIs.
- Developed secure REST APIs and implemented OAuth2 and JWT authentication for external integrations.
- Implemented advanced pricing, subscription management, payment workflows, and automated billing processes.
- Developed reporting, PDF generation, barcode labels, and document automation features.

ACHIEVEMENTS :

- ***Quarterly Best Developer Award*** – Recognized at BrainerHub Solutions for outstanding technical contributions and project delivery.
- ***4-Star Academic Excellence Award*** – Recognized by Masai School for outstanding academic performance, discipline, and consistent learning.
- ***5-Star Badge*** – Earned a 5-Star Python badge on HackerRank for programming proficiency.
- ***Zoom Marathon Challenge Winner*** – Recognized for consistency and dedication through daily video content submissions.
